Graduate-level experience with Java and C++.

High self-motivation and adaptability. Comfortable on large or small teams and communicating across departments.

Experience

Boston University / Application Developer (Full-Stack)

January 2021 - June 2023, Boston, MA

- Designed and built from start to finish, four full-stack solo projects on a LAMP stack.
- Maintained and refactored existing web apps to enhance usability, add features, and future-proof code.
- Impactful project: COM Video, consisted of three fully-integrated web apps. Built as an entirely new app suite, COM Video replaced an outdated system for uploading, managing, and streaming video content. Incorporated Google Drive API and Kaltura API to improve speed and efficiency of uploads and streaming.
- Created an agile environment (sole developer in department) to focus on constant feedback, collaboration, and ensure rapid delivery of new features to users. Recruited two coworkers, who in turn recruited students for collaboration.

Boston University / Desktop Support Specialist I

March 2015 - December 2020, Boston, MA

- Managed a team of 6-8 student employees per semester, which included hiring, training, and scheduling.
 - Provided comprehensive software and hardware support for macOS and Windows clients. Including fully remote support via Windows and Apple Remote Desktop.
 - Monitored and maintained over 200 machines using Quest KACE Management Appliance and JAMF Pro.
-

Education

Boston University / M.S. in Computer Science

2017 - 2020, Boston, MA

Boston University / B.A. in Anthropology

2009 - 2013, Boston, MA
